

# Green-Club

## When and where?

Everyday (except Wednesday) during the second part of lunch, in the Outdoor area. Meet us at the red tent.

## What We Do:

### 1. Planting Wildflowers

We'll be planting wildflowers to attract pollinators and create a vibrant, natural space for everyone to enjoy.

### 2. Start a Permaculture Plot

We're starting a permaculture plot to learn about sustainable farming to produce fruits and vegetables without any pesticides, using complementarity and uniqueness of every plant.

Learn about the incredible world of medicinal plants and their healing properties.

We'll be growing our very own medicinal plants garden, making our school healthier in more ways than one.

### 3. Plant Medicinal Plants

### 4. Build Bird Houses

Calling all bird lovers! We'll be crafting birdhouses to provide a safe haven for our feathered friends. Help us create a welcoming environment for local birds.

## Your Ideas Welcome

We believe in the power of creativity and innovation. Bring your own green ideas to the table and watch them flourish with the support of our Green Club community.

## Why Join?

Make a positive impact on the environment.

Learn about sustainable practices.

Meet like-minded students who share your passion.

Have fun and get hands-on with exciting projects.

Improve your school's green spaces for everyone to enjoy.

Together, we can make a difference in our school and our world.

**Secondary students and staff are welcome to join!**

Let's grow, learn, and make a greener future together! 🌱🌍
